· , · · · · · · · · · · · · · · · · · ·	(ii) Sub sub question that runs a long time until it goes over to a second line				

•\setTotalHline[moveleft=Opt,height=.5pt,color=yellow]

•turn off: \setTotalHline[draw line=false]

3 Total

3 Total

3 Total

- (c) Horizontal rules can be drawn manually without using the \total (and friends) command(s) using the \ourule[<options>] command, where the <options> are exactly the same options as those for \setSubtotalHline. For example:
 - •\ourule
 - •\ourule[color=orange]
 - •\ourule[color=black!50!red,height=3pt,width=.5\textwidth]
 - •You can specify the style of the **\ourule** command globally using, for example,

\setOUrule[color=red,moveleft=-2cm,width=.75\textwidth] Now, when using simply \ourule, the output is:

And then you can overwrite certain aspects as you see fit, for example \ourule[color=blue]

Solution to Question 6 – 4 marks

- (a) The \tutoronly command *only* produces output in the tutor version of the tutor notes, and is ignored when the specsolns option is used. For example students will not see this!.
- (b) The tutor environment is only visible in tutor notes, and is ignored when the specsolns option is used. For example

For tutors only:

This environment will only be seen in the tutor notes.

It will not be seen in the student version.

- (c) The \studentonly command *only* produces output in the special solutions version of tutor notes (so specsolns must be active); for example
- (d) The student environment is only visible in student solutions, when the specsolns option is used. For example
- (e) The \tutororstudent takes two parameters, the first will only be seen in the tutor version (when specsolns is not active), the second will only be seen by students in the student version (when specsolns is active). For example: for tutors!

CMA 41

Solution to Question 1 (inline multi-choice) – 25 marks

Remark: Inline options work in the Tutornote class file in exactly the same way as in the assignment booklet.

Options

well... \mathbf{E} \mathbf{A} yes \mathbf{B} no \mathbf{C} maybe \mathbf{D} never! \mathbf{F} \mathbf{G} Η yes yes yes

Solution to Question 2 (inline multi-choice) – 25 marks

Choose an inline option from four columns.

Options

 \mathbf{A} \mathbf{B} \mathbf{C} maybe D well... yes no \mathbf{E} \mathbf{F} \mathbf{G} \mathbf{H} never! yes yes yes

Solution to Question 3

Choose an inline option at 1.5 spacing.

Options

 \mathbf{B} \mathbf{C} \mathbf{A} yes no maybe \mathbf{D} \mathbf{E} \mathbf{F} well... never! yes \mathbf{G} \mathbf{H} yes yes

Solution to Question 4 (stupid question) – 25 marks

Choose an option.

Options

- A There are no options
- **B** There is one option
- C This option is the wrong choice

QUIZB 01

Cut-off date 1 April 2015

Solution to Question 1 (changing subquestion labels) – 8 marks

- (i) enumitem lets you change the labelling of subquestions
- (ii) goodbye running a long time until it goes over to a second line perhaps

Solution to Question 2 (changing subquestion labels 2) – 8 marks

- (A) enumitem lets you change the labelling of subquestions
- (B) goodbye running a long time until it goes over to a second line perhaps

Solution to Question 3 (Starred version showing no marks)

This question has no marks associated with it on its first line.

4

Solution to Question 4

Another starred question, this time with no optional argument.
